7th Grade

SUBJECT SPOTLIGHT:

Mathematics:

Students in seventh grade will be learning about statistics and will learn how to solve real world problems. Seventh graders will also be learning about mathematical concepts including Algebraic expressions, inequalities, Geometric figures, and ratios and proportions to learn how to solve real world problems and scenarios.

Social Studies:

Cultures of the ancient world will be the topic of seventh grade Social Studies this month. Students will learn about and utilize archaeological and historical research techniques in order to learn about the world that existed long ago.

In order to do this, students will use a variety of online tools and resources.

English Language Arts:

In seventh grade, students will learn how to utilize credible sources to complete research, interact and analyze pieces of literature, and improve their vocabulary through a number of different online tools including Study Island. Students will also

continue to develop their writing skills in the areas of Argumentative, Narrative, and Informative writing.

Science:

The Scientific Method will be the first topic discussed in Science this school year.

Throughout seventh grade, students will learn how to apply the scientific method to concepts including weather, climate, and Earth's resources. Students will also explore water and watersheds as well as the structure of the universe.

STEAM:

During STEAM in seventh grade this school year, students can look forward to working with different coding languages, animation, digital media, robotics, holograms, and the HMS greenhouse. All students will begin the year by taking the VIP² Interest Survey that will help students and the faculty of HPSD determine the best learning experience for each student.
