SUBJECT SPOTLIGHT:

8th Grade

Mathematics:

Students in Pre-Algebra will be starting to discuss real numbers. We will also be starting to solve one-step and two-step equations.

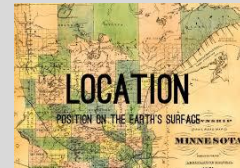

Students in Algebra are working with equations, formulas, absolute value, and simplifying expressions.

Social Studies:

During the month of October, 8th grade students will continue to explore the two branches of Geography and the Geography Theme of Location. Students will learn and apply both relative and absolute locations in developing an

understanding of how to describe where something is located on Earth.

English Language Arts:

Students in Mrs. Smith's and Mrs. Coleman's Language Arts classes are in full swing, studying literary elements, such as plot, conflict, characters, point of view, setting, mood, theme, and symbol. Students are also writing their own narrative and concrete poems along with reading independent novels.

HOW TO WRITE A CONCRETE POEM

Science:

The month of October is all about Exciting Ecology! We will be learning about communities and ecosystems. Our big lab is this month where we will study the ecology of our pond! Science is so cool!

Spanish:

The Spanish course will begin studying the basics, such as the alphabet, numbers 0-30, and basic greetings and salutations.

Looking forward to viewing our class recordings on each topic.
